

Why Compromise When You Can Customize

Santech is your best choice for high quality, low cost, wireless, LED scoreboards. For the past fifteen years we have continuously improved and added features to our products. All of the components that we use are the highest quality. For example, our displays are built using the latest four pin Piranha style LEDs from a top tier manufacturer. They are super-bright and have a very wide viewing angle.

With hundreds of models to choose from, you will probably find the features that you are looking for in one of our standard scoreboards. However, if you are looking for something special, we can create a completely unique board to your specifications for less than other companies charge for an off-the-shelf scoreboard. Just give us a call with your ideas and we will create the exact board that you want. No more settling for the limited choices that other companies offer.

All of our scoreboards are built to be virtually maintenance free. All boards are made entirely from aluminum. The frame is welded completely around all joints and covered with a baked on powder coat paint the makes the finish extremely durable. The LED digits last well over 50,000 hours, and are protected by a highly impact resistant polycarbonate plastic cover. All of our scoreboards come with a five year warranty.

Get the complete story. Give us a call at 800-726-7608. We will be pleased to answer any questions. You can also visit us on the web at www.scoreboards.net. Our email address is sales@scoreboards.net.
