

Santech LED Gas Price Display

*Superbright Display
Quick And Easy To Install
Network and Internet Capable*

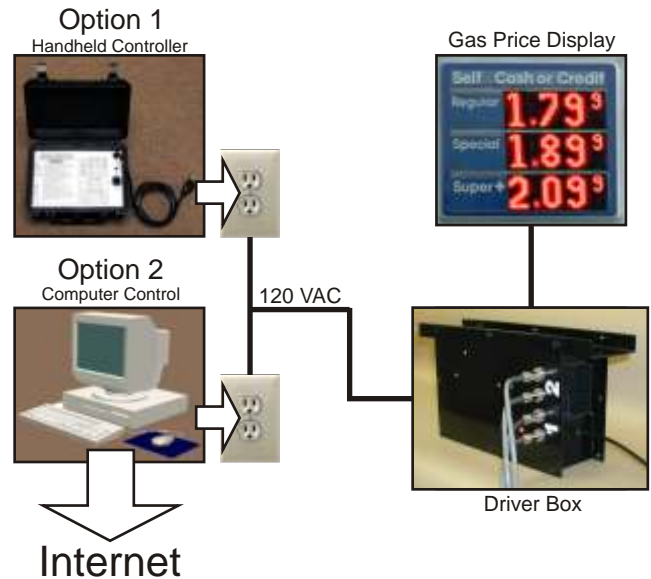

*Shown here is a typical installation.
Custom displays are available. Call for details*

Eliminate the need for manual gas price changing. Gas prices can be changed from an indoor or outdoor location using the handheld controller, or from the main office using the computer / Internet. This gives you instant control over all of your filling stations prices as well as eliminating the need to manually change plastic signs.

Available in two versions, retrofit and replace. Easy to retrofit over your existing gas price sign. Just connect the driver box to 120 Volts AC, attach the LED display panel in place of the backlit plastic numbers, and plug the displays into the driver box. Communicates using the power line, so no additional wires are necessary. Many communication options are available. Call for details.

Easy Installation

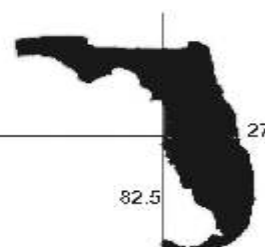

- 1 Remove The Existing Plastic Numbers
- 2 Install The Driver Box
- 3 Attach New Display - Connect To Driver Box

Retrofit Existing Sign

Retrofit package includes gas price displays, display driver box, hand held controller or software for PC control. Data communication over the power line is standard, other communication options such as spread spectrum radio, or RS-485 cable are available.

Model	Digit Size	Unit Size	Matrix	
GPS-M1-8R-XX	8" Tall	12" x 29" x1" Deep	MX.50-8x16	1LED/Pixel
GPS-M1-12R-XX	12" Tall	15" x 36" x1" Deep	MX.75-8x16	1LED/Pixel
GPS-M1-16R-XX	16" Tall	19" x 42" x1" Deep	MX1.0-8x16	1LED/Pixel

Installation:

1. Remove the existing digits.
2. Measure the opening covered by the digits.
3. Check the available size units from the table above.
4. If none of the available units cover the opening, we will provide you with a matching adapter plate to cover the excess opening.

Other sizes are also available. Call for details.
